REASONS FOR ALLOWANCE

Examiner acknowledges a submission of the Amendment to the Claims, Amendment to the Specification and Arguments filed on November 12, 2002. Claims 1, 6, 16 and 22 are amended. Amendment to the Specification has been entered. Amendment and Arguments have overcome rejections under 112, 2nd paragraph and 103(a).

The following is an examiner's statement of reasons for allowance:

In an amended independent Claim 1, applicant discloses an optical switching device having a rotating element including a first electrode, a vertical stop, a second electrode, a means coupled to the first and second electrodes for measuring a capacitance between them, and means for determining a digital control state of the device. The closest reference for the Claim is Yokoyama et al. (US 6,094,293) which discloses most of the elements of the claim. However it does not disclose means for measuring capacitance between a first electrode on a rotating element and the second one. Instead it discloses measurement of the capacitance between two fixed electrodes (elements 98A and 98B in Fig. 11). Another close reference, Little et al., discloses many elements of the claim, but stops short of disclosing means for measuring the capacitance between the electrodes. As to possibility of combining Little et al. with another reference, Netzer, which discloses means for measuring the capacitance between electrodes, it can not be done, because another claim limitation, the vertical

stop, prevents it. Examiner agrees with Applicant, that the introduction of the vertical stop into references, will prevent use of combination of these
